RE: Notice of *Ex Parte* Communication  
*Regarding Promoting Technical Solutions to Combat Contraband  
Wireless Device Use in Correctional Facilities- GN Docket 13-111*

Dear Ms. Dortch,

My name is John Fischer. I am the CEO of Cell Command, Inc. (formerly known as Try Safety First, Inc.). I am submitting this letter to you in accordance with Section 1.1206 of the FCC's rules, 47 C.F.R. § 1.1206. The purpose is to advise you that on Wed., March 8<sup>th</sup>, my colleague Rob Smyjunas and I met with FCC personnel Julius Knapp (Chief Engineer, OET) and Brendon Carr (Acting General Counsel). The meetings took place on the 7<sup>th</sup> and 8<sup>th</sup> floors of the FCC building address listed above.

The purpose of the meeting was to:

1. Demonstrate Cell Command's latest technology to completely turn off contraband cell phones at the device level.
2. Discuss the 3-23-17 NPRM.
3. Discuss our Work In Progress technology using beacons & GEO fencing combined.

More specifically, we demonstrated our newest beacon based technology which shuts down the phone COMPLETELY at the device level. The beacon operates independently and cooperatively across Bluetooth, WiFi and control channel frequencies to immediately shut down the device in less than 2 seconds. We discussed the upcoming NPRM and the discussion of beacon based technology within the report. And lastly, we discussed the potential cost saving benefits of our Work-in Progress beacon and GEO fencing technology.

We stressed the point that ONLY by shutting down the phone completely (i.e. actually turning it off) will ALL nefarious acts, for which contraband phones are used, be eliminated. Other systems which only stop talk or text can and will still be used to video broadcast escape routes, inmate drug usage, torture, rape and gang initiation, affiliation and retaliation all for the purpose to extort, blackmail and generate internet revenue. Our intent in showing this was to clearly differentiate our technology from any other system on the market.

Should you have any further questions concerning this meeting or our technology, please contact me at your earliest convenience.

Best regards,

/John J. Fischer /

John J. Fischer, CEO  
CELL COMMAND, INC.
